Entire Person Health Report

Your health journey begins here. Discover your personalized health plan based on 200+ data points. Your report includes scores for body functions and lifestyle factors, essential for understanding your overall well-being. Discover personalized recommendations tailored to your unique needs.

Table of Contents

Let's take a look at the things we have covered in this comprehensive report

HEALTH SCORE	2
Your Entire Person Health Report score and overall risk zone are based on your self-assessment and lab results. This score reflects the combined impact of your lifestyle factors (roots) and body system functions (branches) on your overall health.	
YOUR HEALTH RISK TREE	3
Your Health Risk Tree is a visual map of your well-being. It shows how your 5 lifestyle factors (like nutrition, exercise, sleep, stress, and relationships) influence your 9 body functions (like Digestion, Metabolism, Immunity, etc.). This report gives you a clear picture of your health, including scores and risk levels for each area. This helps you identify where to focus for improvement.	
RECOMMENDATIONS FOR YOU	6
Your personalized health plan focuses on six key pillars: Nutrition, Physical activity, Sleep, Mental well-being, Social connections, and Harmful substances. These recommendations are curated basis the risk zones of all your body systems. Remember, consistency is key to achieving your goals.	
UNLOCK YOUR BEST HEALTH WITH SUPPLEMENTS TAILORED FOR YOU	13
Your health journey is unique—your supplements should be too. Our personalized recommendation tool helps you discover the right nutrients to fill gaps, support your body's natural functions, and elevate your well-being.	
YOUR BODY FUNCTIONS	24
These essential processes that keep your body functioning optimally, such as digestion, metabolism, and immune function. Think of them as the branches of your health tree, each interconnected and vital for your overall well-being. Understanding and addressing imbalances in these branches promotes optimal well-being.	
LIFESTYLE FACTORS	34
These are the foundations of your health, like the roots of a tree, providing essential nourishment and support. By nurturing these roots, you can cultivate a thriving health tree. In this section you will discover your health score for each of the Lifestyle Factors, risk zones, and how your lifestyle factors (roots) impact your body system functions (branches).	
BIOLOGICAL AGE	40
Biological age isn't just about the number of candles on your birthday cake. It's a measure of your body's true health and vitality, taking into account factors like cellular health, inflammation, and metabolic function.	
LAB TEST RESULTS	41
Your lab tests are in! Do take a look at your biomarker reports and risk zones in this section. These insights are part of your comprehensive Entire Person Health Report.	

Your Health Score

68 / 100

Your health score is moderate, indicating some health risks.

Based on 200+ Data Points across lab tests and health questionnaire.

What does the Health Score mean?

Your Entire Person Health Report is based on a comprehensive assessment of 200+ data points, providing a clear picture of your overall health status and areas for improvement.

Low Risk: If your overall health score is high, you're generally healthy with minimal risks.

Moderate Risk: A moderate score indicates there are potential areas for improvement. Focus on addressing potential health risks identified in your report.

High Risk: A low score signals significant health risks. Prioritize your health, consult a doctor, and address the specific concerns highlighted in your report.

Disclaimer: This health score is for informational purposes only and should not replace professional medical advice, diagnosis, or treatment. It is based on your health questionnaire responses and lab test results. While it offers a general overview of your current health and potential future risks, it is not a definitive health assessment.

Your Health Risk Tree

Branches: Body Functions

Roots: Lifestyle Factors

Your Health Tree is a visual representation of your overall well-being. It's like an ecosystem where your lifestyle factors (roots) nourish and support your body functions (branches). Just as a tree needs strong roots to thrive, your health depends on a balanced foundation of lifestyle factors. By understanding these connections, you can identify areas for improvement and optimize your health.

For example, your digestion (branch) is impacted by nutrition and exercise (roots).

Your Health Risk Tree

Your Health Tree provides insights into 9 body functions and 5 lifestyle factors. Focus on areas with red scores, which indicate high risk, and yellow scores, which reflect moderate risk. Green areas signify low risk and good performance. For detailed insights and personalized recommendations, explore the sections on body functions and lifestyle factors.

Branches: Body Functions

Roots: Lifestyle Factors

Your Probable Health Risks

- Nutritional Deficiencies
- Kidney Disorder
- Bacterial or viral infections

BODY FUNCTIONS THAT NEED ATTENTION

- Heart And Vascular Dynamics
- Bone And Joint Health
- Inflammation

LIFESTYLE FACTORS THAT NEED ATTENTION

- Sleep
- Nutrition
- Stress

Recoup Your Health

Discover tailored recommendations for optimal well-being. Our plan focuses on six key pillars: Nutrition, Physical activity, Sleep, Mental health, Relationships, and Harmful substances. These recommendations are based on your health risks and designed to support your journey to optimal health.

The Six Pillars of Health

Nutrition

Physical
Activity

Mental
Wellbeing

Sleep

Social
Connection

No Harmful
Substances

Key Areas of Improvement

Based on our analysis, we have identified 3 body functions that requires your attention. The personalized recommendations given below addresses them. Remember consistency is the key!

Heart And Vascular Dynamics

Bone And Joint Health

Inflammation

Recommendations to wellness based on 6 Pillars

Nutrition

Your nutrition plays a vital role in your overall well-being. By optimizing your diet, you can support your body's functions, boost your energy levels, and improve your overall health. Our personalized recommendations focus on addressing any nutritional deficiencies and providing you with the fuel you need to thrive.

Optimal nutrition for you

1. Increase Omega-3 Fatty Acids

Fatty fish like salmon or plant-based sources like flaxseeds can help reduce inflammation and improve heart health.

2. Limit Sodium Intake

Reducing salt in your diet can help manage blood pressure levels effectively.

3. Calcium-Rich Foods

Include dairy products or fortified alternatives along with leafy greens like kale or broccoli for calcium intake necessary for bone health.

4. Incorporate Anti-Inflammatory Spices

Use turmeric and ginger in your cooking. Both spices have powerful anti-inflammatory properties that can help reduce inflammation in the body.

Mental Wellbeing

Stress can have a significant impact on your physical and mental health. By implementing effective stress management techniques, you can improve your overall well-being. Your personalized recommendations will help you identify and address stressors in your life, promoting a more balanced and harmonious existence.

Nurturing your mental wellbeing

1. Imagine Your Happy Place

Take a moment to close your eyes and picture a peaceful place that makes you feel calm, like a beach or a quiet forest. This quick mental break can help lower stress and boost your mood.

2. Schedule your "Me Time"

Dedicate time in your schedule for activities that bring you joy, such as reading or relaxing. Prioritizing self-care supports mental balance and reduces stress.

3. Choose What Brings You Joy

Focus on activities that make you happy and fulfilled. By choosing to spend your time on what matters most, you can feel more balanced and improve your well-being.

4. Practice Deep Belly Breathing

When stressed, practice deep belly breathing by placing a hand on your abdomen and taking slow, deep breaths. This grounding technique can bring calm and clarity to your thoughts.

Social Connection

Your relationships play a vital role in your overall well-being. Strong social connections provide support, reduce stress, and boost your mood. Your personalized social connection recommendations are based on your unique health profile.

Strengthening Your Circle

1. Social Support System

Build strong social connections with friends, family, and loved ones. Having a strong support system can help reduce stress, which is beneficial for heart health.

2. Join Support Groups

Connecting a support group/ individuals who understand your experiences can provide emotional support, reduce stress, and improve overall heart health.

3. Spend time with Friends/ Family

Aim to spend quality time with friends and family at least once a week. Strong social connections can reduce stress and improve overall well-being, positively impacting your overall health.

4. Volunteer for Causes You Care About

"Find a local charity or community event that resonates with you. Volunteering alongside others fosters meaningful connections while helping you stay active and involved in your community."

Supplements

Elevate Your Health—Personalized Supplements for a Stronger, Energized You

Your health journey is unique, and the right supplements can make all the difference. Our personalized recommendation tool helps you discover precisely what your body needs to bridge nutritional gaps, support natural functions, and elevate your overall well-being. Every recommendation is rooted in science, designed to align with your lifestyle, and tailored to help you feel your best.

Take control of your health today. Every small step toward wellness brings you closer to a life of vitality, strength, and balance.

Disclaimer:

Always consult with a qualified healthcare provider before starting any supplementation to ensure it's appropriate for your health needs. This tool is for educational purposes only and does not replace professional medical advice. Discuss all supplements with your healthcare provider to avoid potential interactions and complications.

1. Multi-Vitamins

HOW IS IT BENEFICIAL?

A daily multivitamin can boost calcium for stronger bones, enhance iron for better energy, support B12 for brain health, and improve magnesium and B6 for mood and muscle function. Plus, it helps lower CRP levels, promoting overall wellness and vitality. Remember this information.

TARGETED NUTRITIONAL ELEMENTS

● Vitamin C

● Vitamin B12

● Vitamin E

POSITIVE IMPACT ON BODY FUNCTIONS

Immune System

Skin & Joints

Nervous System

BRANDS & DOSAGES

1. Garden of Life - Vitamin Code Raw Iron

- 1 capsules, -
- Daily, 3-6 months.

RECOMMENDATION BASED ON YOUR

AGE

GENDER

FOOD GRADE

3. CoQ10

HOW IS IT BENEFICIAL?

CoQ10 supports energy production at the cellular level, protects cells from oxidative damage, and promotes heart and brain health. It also helps combat fatigue and boosts exercise performance.

BIOMARKER(S) BOOSTED BY THE SUPPLEMENT

- Serum LDL Cholesterol
- Serum Triglycerides
- C-Reactive Protein (CRP)

POSITIVE IMPACT ON BODY FUNCTIONS

-  Heart Health
-  Blood Flow
-  Energy & Metabolism

BRANDS & DOSAGES

1. Garden of Life - Raw CoQ10

- 1 capsule, With meals
- Daily, 3-6 months.

RECOMMENDATION BASED ON YOUR

-  AGE
-  GENDER
-  ALLERGIES
-  FOOD GRADE

2. Thorne Research - CoQ10

- 1 gelcap,
- Daily, 3-6 months.

-  AGE
-  GENDER
-  ALLERGIES
-  PHARMA GRADE

3. Solgar - Coenzyme Q10 100 mg Softgels

- 1 softgel, Preferably at mealtime
- Daily, 3-6 months.

-  AGE
-  GENDER
-  ALLERGIES
-  PHARMA GRADE

5. Zinc

HOW IS IT BENEFICIAL?

Zinc strengthens the immune system, supports healthy skin, and aids wound healing. It contributes to DNA synthesis, cell growth, hormonal balance, and sensory functions like taste and smell while promoting reproductive health.

BIOMARKER(S) BOOSTED BY THE SUPPLEMENT

- C-Reactive Protein
- Albumin - Serum
- Total Leucocytes Count (WBC)

POSITIVE IMPACT ON BODY FUNCTIONS

-  Immune System
-  Skin & Joints
-  Hormonal Balance

BRANDS & DOSAGES

1. NOW Foods - Zinc Picolinate 50 mg

- 1 capsule, With a meal
- Daily, 1-3 months.

-  AGE
-  GENDER
-  ALLERGIES
-  PHARMA GRADE

2. Himalayan Organics - Plant-Based Zinc With Vitamin C

- 1 capsule, With water after meals
- Daily, 1-3 months.

-  AGE
-  GENDER
-  FOOD GRADE

3. Solgar - Zinc Picolinate 22 mg

- 1 tablet, With a meal
- Daily, 1-3 months.

-  AGE
-  GENDER
-  PHARMA GRADE

Your Body Functions at a Glance

“

"Your health is a complex ecosystem.' This section reveals the intricate relationship between your lifestyle factors and body functions, providing insights into your health scores, risk zones, and areas for improvement. By understanding these connections, you can optimize your well-being and create a thriving health ecosystem."

- **Dr. Deepak Sharan**

Chief Executive Officer & Chief Scientific Officer

”

Digestive Health

Digestion is your body's way of breaking down food into nutrients. It's like a factory, turning food into fuel. Proper digestion ensures you get the energy and nutrients you need to function well. Problems with digestion can lead to discomfort, weight issues, and even other health problems.

Moderate Risk

Untangling the Roots

The **Moderate score** of the Digestion Health function is positively influenced by the lifestyle factors of **Relationships, Nutrition and Exercise And Movements**.

Insights

Disclaimer: This is entirely based on your responses to the subjective questionnaire.

DOING GREAT

- Healthy and free from frequent problems
- Practices responsible drinking
- Chews food properly
- Content after meals
- No post-meal discomfort

NEEDS IMPROVEMENT

- Inconsistent bowel function

NEEDS ATTENTION

- Stress Eater

Elimination

Elimination is essential for your body's health. It's how your body gets rid of waste products. Proper elimination helps prevent constipation, bloating, and other digestive issues. It also plays a role in overall well-being and can affect your energy levels, mood, and skin health.

Low Risk

- Good Body Balance & Gait

NEEDS IMPROVEMENT

- Occasional aches/ pains at work
- Occasional numbness/ pain
- Moderate Physical Activities

NEEDS ATTENTION

- Obesity Class I

Lifestyle Factors

Understanding Your Lifestyle Factors:

Explore the foundations of your well-being in this section. Discover your health scores, risk zones, and how your lifestyle factors (nutrition, exercise, sleep, stress, relationships) impact your body functions. By nurturing these roots, you can cultivate a thriving health tree.

Nutrition

Nutrition: Fueling Your Body. Think of your body as a high-performance machine. Just like a car needs the right fuel to run smoothly, your body needs the right nutrients. Nutrition provides the energy, building blocks, and essential vitamins and minerals your body needs to function at its best. It's the foundation of your health and well-being.

DOING GREAT

- Practices responsible drinking
- Chews food properly
- Content after meals
- No post-meal discomfort

NEEDS ATTENTION

- Struggles to quit smoking
- Showing signs of smoking-induced problems
- Obesity Class I
- Excess body fat (Central Obesity)
- Significant weight change in recent weeks
- Stress Eater

Sleep

Sleep: The Body's Recharge. Think of sleep as your body's reset button. It's when your body repairs, rejuvenates, and strengthens itself. Good sleep is essential for memory, mood, energy levels, and overall health. It's like a good night's rest for your whole system!

NEEDS IMPROVEMENT

- Feels anxious at times
- Might have access to fresh air
- Partially noisy environment
- Experiences sleep disturbances
- Occasionally energized in the morning
- Occasionally drowsy

NEEDS ATTENTION

- Quite Stressed

Stress

Stress: The Silent Health Thief. Stress is like a constant companion, influencing every aspect of your life. It can affect your mood, sleep, digestion, and even your immune system. Managing stress effectively is crucial for maintaining overall health and well-being. Think of it as protecting your body from the wear and tear of daily life.

- Great work-life Balance

NEEDS IMPROVEMENT

- Moderately struggles with focus
- Occasional self-starter
- Feels anxious at times
- Balanced living/ work environment
- Experiences sleep disturbances
- Occasionally drowsy

NEEDS ATTENTION

- Quite Stressed

Exercise & Movement

Exercise: Fueling Your Body and Mind: Exercise is like a magic potion for your body and mind. It strengthens your muscles, improves your cardiovascular health, and boosts your mood. Regular physical activity helps you maintain a healthy weight, reduces stress, and even improves your sleep. So, lace up those sneakers and get moving!

DOING GREAT

- Good Belonging to the neighborhood
- Good social circle
- Connected to the community

NEEDS IMPROVEMENT

- Partially positive community

Your Biological Age

Your Biological Age is 6 years and 8 months more than your Calendar Age

+ 6 years and 8 months

How to read a biological age scale?

A Biological Age (BA) scale shows how your body's health compares to your actual age.

Key Tips for Interpretation:

- A lower biological age, it means your body is healthier and aging slower.
- If your biological age is higher, it suggests areas to improve; like diet, exercise, or stress management.

Biological age can be measured at any time, but it's most accurate and meaningful from your early 20s onward, as your body's systems and biomarkers have stabilized. Predictions become even clearer in midlife and beyond, when age-related changes are more pronounced.

Please Note: If you're taking medications or supplements that affect biomarkers like cholesterol, blood pressure, inflammation, etc., your biological age might appear younger due to improved health markers from those treatments.

Lab Test Results

Your Lab Results: A Window into Your Health

This section provides a detailed breakdown of your lab test results, offering insights into your overall health. We've analyzed your biomarkers and categorized them into risk zones based on established guidelines.

Exploring Biomarkers

Crack the code to your health!

This section of your EPH report uncovers the insights from 103+ lab tests. We break down what each test measures, interpret your results (low, normal, high), and provide clear explanations. It's time to move beyond the numbers and take control of your well-being!

BIOMARKER	MEASURED VALUE	NORMAL RANGE
Blood Cell Analysis Panel		
Basophils Absolute Count	70 X10 ³ /μL	25 - 150
Eosinophils Absolute Count	500 X10 ³ /μL	50 - 500
Lymphocytes Absolute Count	3860 X10 ³ /μL	1000 - 4000
Monocytes Absolute Count	650 X10 ³ /μL	100 - 700
Neutrophils - Absolute Count	5340 X10 ³ /μL	1500 - 8000
Basophils	0.7 %	0 - 2
Eosinophils	4.8 %	0 - 6
Hemoglobin	16 g/dL	13.5 - 17.59
Total Leucocytes Count (WBC)	10430 X10 ³ /μL	4000 - 11000
Lymphocyte	37 %	20 - 45
Monocytes	6.2 %	2 - 10
